

ABSTRACT

A CD changer includes a plurality of holders 19, a disk playback part, and a stopper part 100. A holder 19 holds a CD. The stopper part 100 includes a first stopper 103, a second stopper 104, a swing stopper 105, an up-down stopper 106, and an auxiliary stopper 107. When the disk playback part plays back the selected CD, the first stopper 103 supports the other CDs at the arrow K1 side, and the second stopper 104 and the auxiliary stopper 107 support the other CDs at the arrow K2 side. The swing stopper 105 supports the selected CD. When the selected CD is clamped, the swing stopper 105 is saved from the selected CD.
